

What to expect

FROM EXPERT TO IMPACT

Two intensive, interactive workshop days in which you develop your role as an in-house lawyer from three perspectives: impact in the business, efficient legal work and professional visibility. Short inputs alternate with practical cases, exercises and group exchange.

DAY 1

Impact in the business and efficient legal work

Day one is about how legal creates real value for the business and which structures enable effective, scalable legal work.

- | | |
|----|--|
| 01 | The transformation of the profession
How artificial intelligence is changing legal work and which capabilities are becoming increasingly decisive for in-house lawyers. |
| 02 | Legal as a true business partner
How to understand business goals better, align legal advice with them and position yourself as part of shared success. |
| 03 | Communicating for your audience and solution-oriented
How legal analysis becomes a clear recommendation that genuinely helps the business move forward. |
| 04 | Intake and triage
How legal teams channel and prioritise requests and deploy capacity where legal judgement creates the greatest value. |
| 05 | Decision rights and conscious risk decisions
Which decisions actually sit with legal, and how you help business and management take risk decisions consciously at the right level. |
| 06 | Networking dinner
In the evening we continue the exchange in a relaxed atmosphere over dinner at a restaurant near the workshop location. |

What to expect

FROM EXPERT TO IMPACT

DAY 2

Artificial intelligence, visibility and implementation

Day two combines new technological possibilities with the human capabilities that remain essential for a successful in-house career.

- | | |
|-----------|--|
| 01 | Standardise, automate and scale
How to simplify and structure recurring legal work as the foundation for self-service, automation and the meaningful use of artificial intelligence. |
| 02 | Artificial intelligence in the legal department
A practical overview of the possibilities beyond the chat window, how to choose suitable models and the fundamentals of effective prompting. |
| 03 | From prompt to AI-supported legal workflow
How to integrate artificial intelligence into a complete workflow, identify sensible use cases and safeguard human judgement, control and accountability. |
| 04 | Presence, evidence and allies
How your presence, a clear account of your results and a resilient network ensure that your impact is actually recognised in the business. |
| 05 | Personal implementation plan
To close, you translate the insights into your concrete professional situation and define the next steps for your working life. |

AND AFTERWARDS

Two months of implementation support

Implementation starts after the workshop: for two months you apply the approaches in your day-to-day work, supported by email support and a personal 1:1 video check-in to review experiences, resolve open questions and develop your next steps.
